

Chapter 1: Angel's Heart

25th Day

January 25th

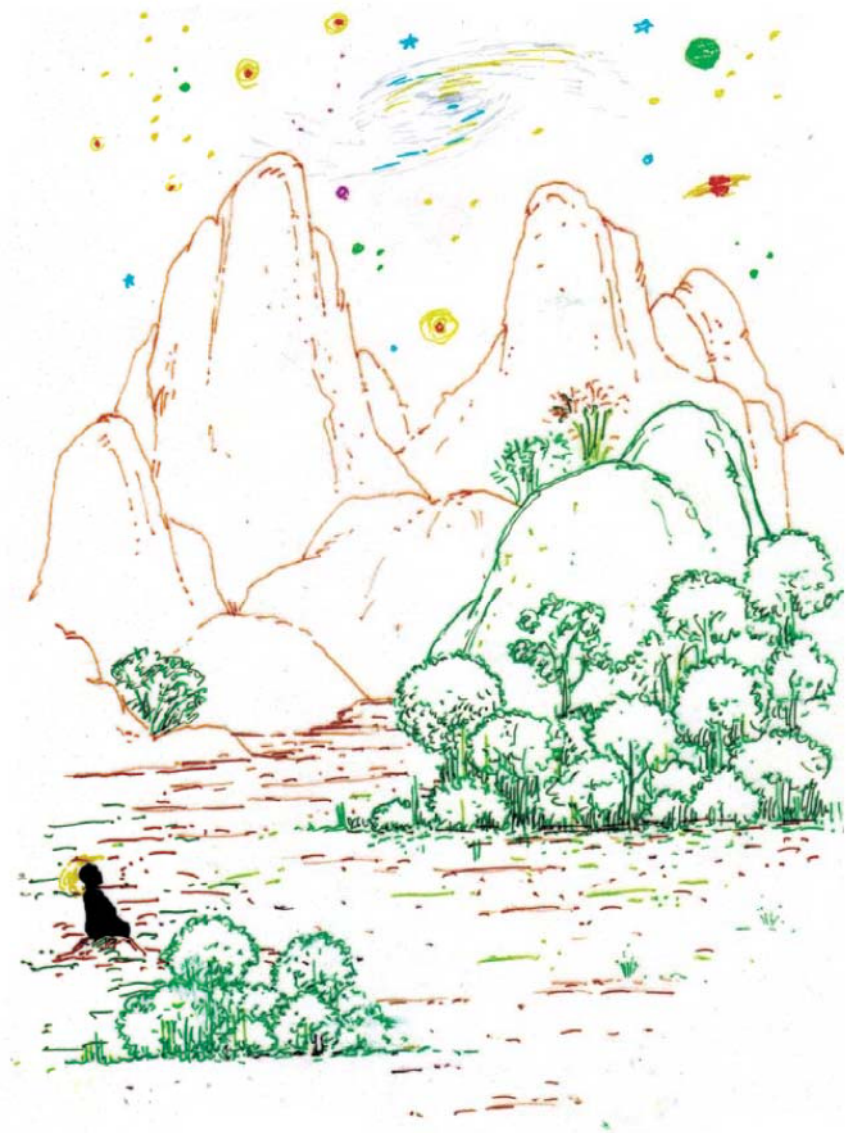

Magic in the Tao

We dreamed that we could be,
So we were and always will be.
This is the Genius, Power
And Magic in the Tao.

We were a manifestation
Of our own Being.
We reenact this Original Creation
Every time we have
A thought during the day.

When we focus on that thought,
We can manifest its image;
And with our ability to focus
We can manifest it now.

We are only reenacting,
What we did in the beginning,
Every time we have a thought.
This is the Magic in the Tao.

Commentary:

All manifestations start with a thought and that is a dream of what we could be, are and always will be. Every time we have a thought, we reenact the original thought of the creation of ourselves and the universe. When we focus on the thought, we manifest its image into physical reality which is determined by our ability to focus as it manifests. For we are only reenacting what we already did collectively creating the beginning of our universe and this is the magic in the Tao.
